

--That the FCC should not implement
any proposal that would lessen
Indiana's Telephone Privacy law
protections.

It is so nice to have my home life back without constant interruptions from
telemarking companys. I actually can enjoy my evening meal thanks to the Indiana
"No Call Law"

I now feel as if my telephone is a convenience and not a invasion to my life. We
have went from 4-8 unwanted calls per night including weekends to maybe two per
month. What a relief.

Thank you for your attention to this
message. Working together, we can
ensure the success of our Telephone
Privacy program for many years to come.

Sincerely,
Bob Kramer
